Subject: RE: Replacement of FMC Groundwater Monitoring Wells 108 and 122

Heather: The well-drilling contractor, Cascade Drilling, is following the well installation and development procedures detailed in Appendix A of the EPA-approved FMC OU Extraction Zone Hydrogeologic Study Work Plan (HSWP; January 2014) with the exception that these are replacement wells and will be constructed to replicate the replaced wells in terms of their construction details (e.g., 4-inch PVC casing, screen length, slot size and elevation for top/bottom screen, and annular materials) as described in FMC's June 17, 2015 letter. A qualified MWH geologist is supervising the well installation and development consistent with the work plan. A copy of the HSWP is attached.

The replacement wells (108A and 121A) will be sampled in accordance with the EPA-approved Slag Pit Sump Post-Closure Plan (August 2014) attached. FMC's long-time groundwater monitoring/sampling contractor, Hydrometrics, will perform the groundwater sampling. Thanks, Rob

Hi Rob or Marjo, Can you provide me with any Quality Assurance/Quality Control Documentation you have for your activities to replace the groundwater monitoring wells that are referred to in the email below.

Thank you
